Forecast for Friday 03 Jun 2022

Weather: Much of the morning will likely be quite wet, with the potential for some heavy bursts of rain at times, especially further to the north. Cloud and rain will tend to break up into showers into the afternoon, with the scope for some slow-moving thundery downpours for a time. Any showers then mostly fading away through the evening.

Chance of cloud-free hill tops above 800m: 30% until midday, becoming 60% through the afternoon, then >90% by early evening.

Low Cloud and visibility: Extensive cloud is likely above 500 metres in the north, with this becoming ever more fragmented further to the south. By midday, as frontal rain breaks up, the main base should lift clear of the summits, but occasional patches are likely above 600 metres during and soon after any heavy showers. Summits should become clear as showers ease by the evening. Good visibility during the afternoon outside of any showers.

**Level above which ground is expected to be frozen/snow is expected to settle.*

Meteorologist's View

UV levels will be high at times, especially by mid-afternoon if the cloud does break up, so adequate sun protection is recommended.

Forecast for Saturday 04 Jun 2022

Weather: Dry for much of the day, with the best of the sunshine through the morning. This turning increasingly hazy through the afternoon and becoming cloudy by the evening, with the risk of showers, perhaps heavy, before nightfall. A brisk east or northeast wind developing, with summits feeling quite a bit colder than sheltered valleys. High UV levels.

Maximum wind: East or northeast, 35 mph, some buffeting possible.

Chance of cloud-free hill tops above 800m: 40% until after dawn, becoming >90%, reducing to 70% again by evening.

Low Cloud and visibility: Broken cloud above 400-600 metres likely across eastern hills through the early morning, lifting and breaking soon after sunrise. Occasional patches of cloud possible again by late evening, especially in association with any showers. Otherwise very good visibility.

Temperature: **Valleys:** Plus 6 Celsius becoming plus 18 Celsius
At 800m: Plus 8 Celsius.
Freezing level: Well above the summits.
